SUMMARY

Data analyst skilled in translating complex data into clear, actionable insights. Proficient in SQL, Power BI, Tableau, and data visualization. Currently exploring AI and machine learning to enhance data-driven decision-making.

WORK EXPERIENCE

Graduate Research Assistant at Human Performance Lab	September 2024 - Present
- Produced and edited over 5 high-quality video segments showcasing the capabilities of the HPL, presented to department leadership and key stakeholders during the lab's official launch, enhancing visibility and institutional support - Provided technical support by maintaining and testing lab equipment for classes and research, managing inventory, and ensuring 100% operational readiness across all sessions - Collected, cleaned, and organized over 500 video data files and activity metrics from Moki devices for 16 participants in the ASMT Research Project, enabling efficient evaluation by faculty and supporting weekly reporting for the research team	
Graduate Assistant at Office of Provost, Monmouth University	January 2024 - April 2024
- Provided high-level technical support for the Navigate Monmouth app, overseeing communications sent to over 4,300 undergraduate students, training faculty on platform use, and ensuring smooth functionality across all user levels - Created digital content, generated cohort-based analytical reports for leadership presentations to the President and Provost, and developed training materials to support efficient onboarding and system adoption by students, staff, and faculty - Collaborated cross-functionally with 20 members of the Navigate Team, contributing to successful implementation, testing, and rollout phases of app updates and features	
Graduate Assistant at Office of Graduate Studies, Monmouth University	January 2023 - April 2023
- Collected, verified, and documented data for over 2,700 university courses across all departments and schools, identifying discrepancies on the official website and creating a centralized master sheet with course details, directors, and academic info. - Transformed raw datasets into visual insights by creating graphs, tables, and summaries using Microsoft Excel, enhancing data readability and usability for departmental reporting - Assisted 3 additional departments with data cleaning and analysis tasks, showcasing attention to detail and effective collaboration across interdisciplinary teams	
Intern at Optomech Engineers Pvt Ltd	December 2021 - April 2022
- Executed detailed testing protocols at varying speeds, identifying and fixing 98% of internal issues - Drafted user manuals for new machines, enhancing product communication and reducing user queries by 30% - Engineered collaboration with the Sr Dev Engineer to train AI for seal defect detection, improving detection accuracy by 20%	

PROJECTS

AuoPriceIQ: Analyzing & Modeling Vehicle Price Factors	February 2025
- Performed EDA on car dataset to analyze price impact of engine type, fuel, and body style using visualizations and summary statistics. - Built and evaluated linear regression models with feature selection and cross-validation to predict car prices - Used Orange (Low-Code) for modeling, correlation analysis, and presenting insights through structured dashboards and slides	
Night Sky Object Classification with Neural Networks	March 2025
Developed a neural network model to classify stars, galaxies, and quasars using the SDSS17 dataset with 100,000+ spectroscopic observations - Performed exploratory data analysis (EDA), feature engineering, and model tuning using Python, NumPy, Pandas, TensorFlow/Keras, SMOTE (Synthetic Minority Over-sampling Technique) and undersampling - Achieved 97% accuracy in detecting quasars, aiding in astronomical research on galaxy formation, cosmic expansion, and black holes	
FOMC Meeting Minutes & News Analysis using NLP	April 2025
Engineered structured text corpora by collecting and preprocessing Federal Open Market Committee (FOMC) meeting minutes and Guardian news articles (2022–2025) to support monetary policy analysis - Conducted sentiment analysis, topic modeling (LDA), n-gram analysis, and network visualization using Orange to extract insights from unstructured text Revealed correlations between central bank policy tone and media sentiment, highlighting potential influence on economic outlook and market perception	

KEY SKILLS

Technical Skills: Java, Python, HTML, CSS, JavaScript, AWS, Azure, MySQL, Snowflake, MongoDB
Tools & Analytics: Ms Excel, Tableau, Power BI, Google Colab, LabView, Orange Data Mining

Certification

Google Data Analytics | Microsoft Power BI Data Analyst | Google Cybersecurity |Cybersecurity Essentials | Multi-Cloud Network Associate Course | Introduction to Structured Query Language (SQL)

EDUCATION

Master of Science: Management Information Systems	May 2025
Monmouth University GPA- 3.45 West Long Branch, NJ	
Bachelor of Science: Electronics And Communication Engineering	May 2022
KL University GPA- 3.36 Hyderabad, India
